The final selection shall be based upon the joint decision by the funding institutions. The applicable awarding institution will base its decision on the national evaluation procedure of proposals and within the scope of the available budget.

For Path 1: Each project may be supported with a maximum amount of 30.000 EUR per year for a period of up to 3 years, by each of the funding institutions.

For Path 2: Each project may be supported with a maximum amount of 100.000 EUR per year for a period of up to 3 years, by each of the funding institutions.

The eligible cost in the call are the following:

- personnel,
- equipment,
- consumables,
- travel,
- subcontracting,
- other costs.

The detailed information about the cost categories is included in the national regulations.

IV. Composition of consortia

Participation is open to applicants from the funding countries (Poland and Taiwan).

For Path 1: possible applicants include research institutions on the Polish side, and research institutions on the Taiwanese side.

For Path 2: possible applicants include obligatorily small and medium enterprises and optionally research institutions on the Polish side, and enterprises and obligatory research institutions on the Taiwanese side.

The funding institutions expect that the bilateral cooperation covered by the scope of this funding, will deliver significant synergy effects within the framework of projects to be funded. Proposals must therefore make clear why they should be developed cooperatively between the participating countries and what the added value will be created through this collaboration. Projects that do not indicate why this cooperation is necessary cannot be considered.

The call targets existing research contacts between Poland and Taiwan in order to prepare joint project proposals as well as new partnerships between Polish and Taiwanese researchers and entrepreneurs.

Projects have to involve at least one Polish and one Taiwanese partner. The application has to present researchers involved in the project as well as clear division of responsibilities among the consortium members. An individual researcher may participate in only one project proposal.

V. Submission of applications

For each proposal, project partners have to choose from among themselves one Taiwanese and one Polish Project Leader - an entity formally responsible for submitting the proposal on behalf of all project partners. The responsibilities of the Project Leaders are to keep the other project partners updated on the submission process, to ensure the internal management and coordination of the project.

There is a one-level procedure for submission of proposals. Each proposal shall comprise a project description and further formal and financial information according to the required form.

A grant application must be submitted by Polish Project Leader to the following email address in NCBR: tajwan@ncbr.gov.pl and by a Taiwanese Project Leader through the MOST electronic system **no later than 31st July 2021**. Submissions received after the deadline will not be processed.

 Submitted Applications have to be identical and filled in English.

VI. Evaluation procedure

The proposals will be evaluated according to the national regulations of the funding institutions. The final decisions on what projects to support will be made by the funding institutions based on evaluations from the external experts, national priorities and funding criteria. The evaluation process includes three steps:

1. Eligibility check

The following general eligibility criteria will be checked:

- appropriate length of the proposal,
- inclusion of all necessary information,
- eligibility of the Principal Investigators,
- eligibility of other project partners,
- participation of researchers from both Poland and Taiwan,
- eligibility of required funding,
- accordance between national application forms submitted by the Taiwanese partners to the MOST and the Polish partners to the NCBR. In case of any discrepancy between the two, the partners will be called to present an explanation.

2. Peer review

Independent scientific experts will carry out the anonymous peer review of the eligible project proposals according to evaluation criteria. Each proposal will be evaluated by three Taiwanese and three Polish peer reviewers.

The evaluation is done based on the following criteria:

- A. Coherence with the call topic;
- B. Scientific excellence and originality of the proposal:
 - originality of project idea,
 - innovative potential,
 - quality (sound concept, appropriate methods, quality of objectives).
- C. Feasibility, quality and efficiency of the project plan:
 - effectiveness of the methodology,
 - feasibility (governance, adequate budget, resources, time schedule),
 - investigators' knowledge and experience in the field of research: scientific track-record, publications in scientific journals,
 - relevance and strengths of partners (including resources and infrastructure),
 - standing of the organisation the applicants belong to.
- D. For Path 1: potential impact and contribution to the scientific community, expected exploitation of the results:
 - intended short-term outcomes,
 - intended long-term impacts.For Path 2: Potential commercialisation prospects; expected commercial exploitation of results:
 - intended short-term outcomes,
 - intended long-term impacts.
- E. Bilateral cooperation and transnational added value:
 - cohesion of the proposed research,
 - level of the collaborative interaction between project partners,
 - sustainability of the expected collaboration.

All proposals are assessed whether they fit the description of the thematic research priorities. If a proposal is not coherent with the programme theme it will be rejected from further evaluation.

3. Council

A council consisting of experts appointed by the NCBR and the MOST will discuss the results of the peer review process, review problematic cases and make a final ranking list of the projects to be funded.

VII. Communication of project evaluation decisions

The outcome of the evaluation of the proposals will be communicated to applicants in accordance with the respective communication procedures of the funding institutions.

VIII. Decision process and the start of projects

The formal funding decisions will be taken jointly by the funding institutions after the proposals have been evaluated by the external experts. Each country will fund its own project partners.

When final decisions have been conveyed to project participants, successful applicants must enter into individual contractual agreements with their national funding institutions. A consortium agreement must be concluded between the project partners and has to regulate, *inter alia*, duties and responsibilities, use of project results and intellectual property rights (IPR) issues. The consortium agreement and the above mentioned individual contractual agreements are prerequisites for the first payments made to the project partners from the national funding institutions. The involved funding institutions will monitor and supervise the funded projects (reporting).

IX. Contact points

Potential applicants are advised to contact the national contact points before writing proposals to carefully check the specific national application and funding conditions.
